THE AUTOMATED B2B LEAD GEN AGENT

Messy data in. Hyper-personalized WhatsApp outreach out.
Works the night shift so you wake up to qualified replies.

Gemini Notebook

MANUAL GRIND VS. AUTONOMOUS SCALE

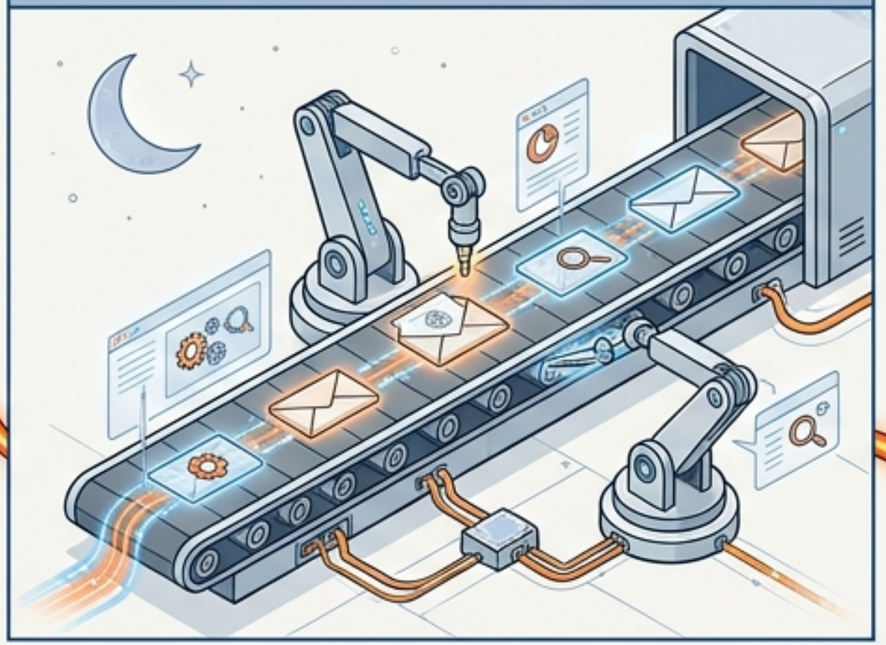

Replace expensive, generic manual labor with a tireless system that researches, writes, and delivers targeted pitches while you sleep.

THE OLD WAY

- HIGH COST
- SLOW SPEED
- GENERIC SPAM

THE AUTOMATED WAY

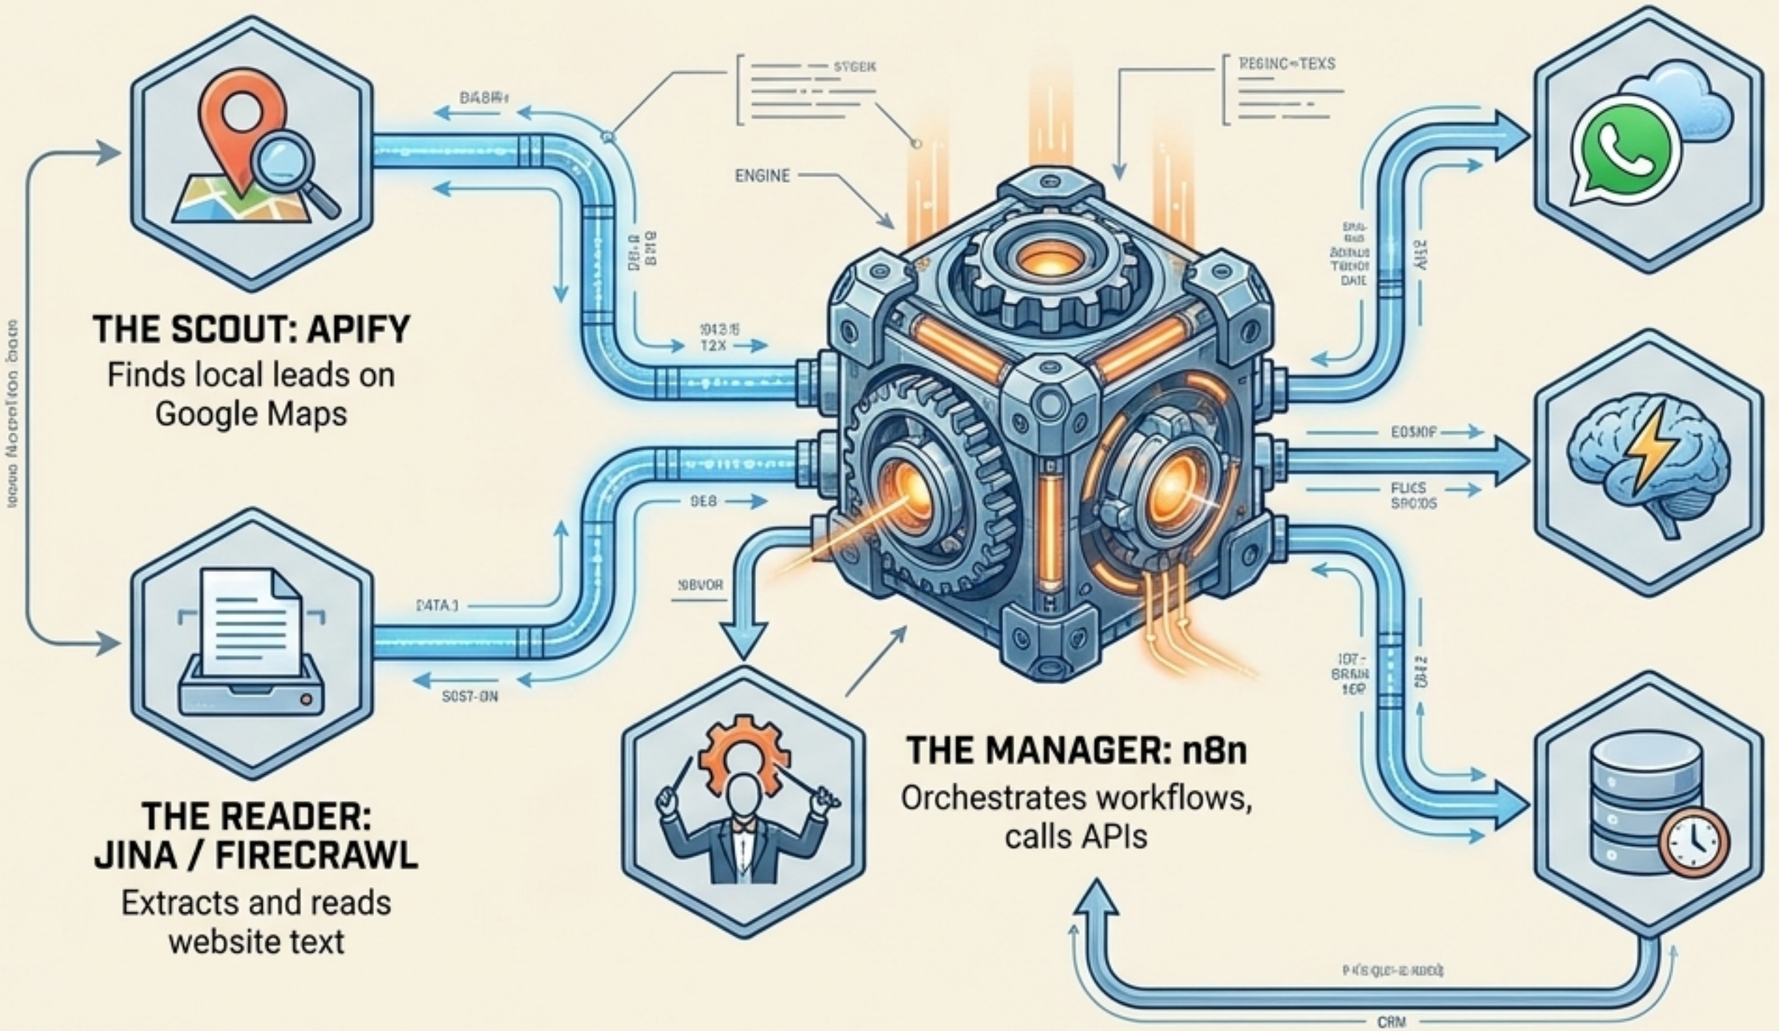

- NEAR ZERO-COST
- INSTANT SPEED
- HYPER-PERSONALIZED

Gemini Notebook

INSIDE THE MACHINE: SIX CORE ORGANS

Six distinct tools working in perfect unison, orchestrated entirely by n8n.

THE SCOUT: APIFY
Finds local leads on Google Maps

THE READER: JINA / FIRECRAWL
Extracts and reads website text

THE MANAGER: n8n
Orchestrates workflows, calls APIs

THE MESSENGER: META WHATSAPP CLOUD API
Delivers the pitch

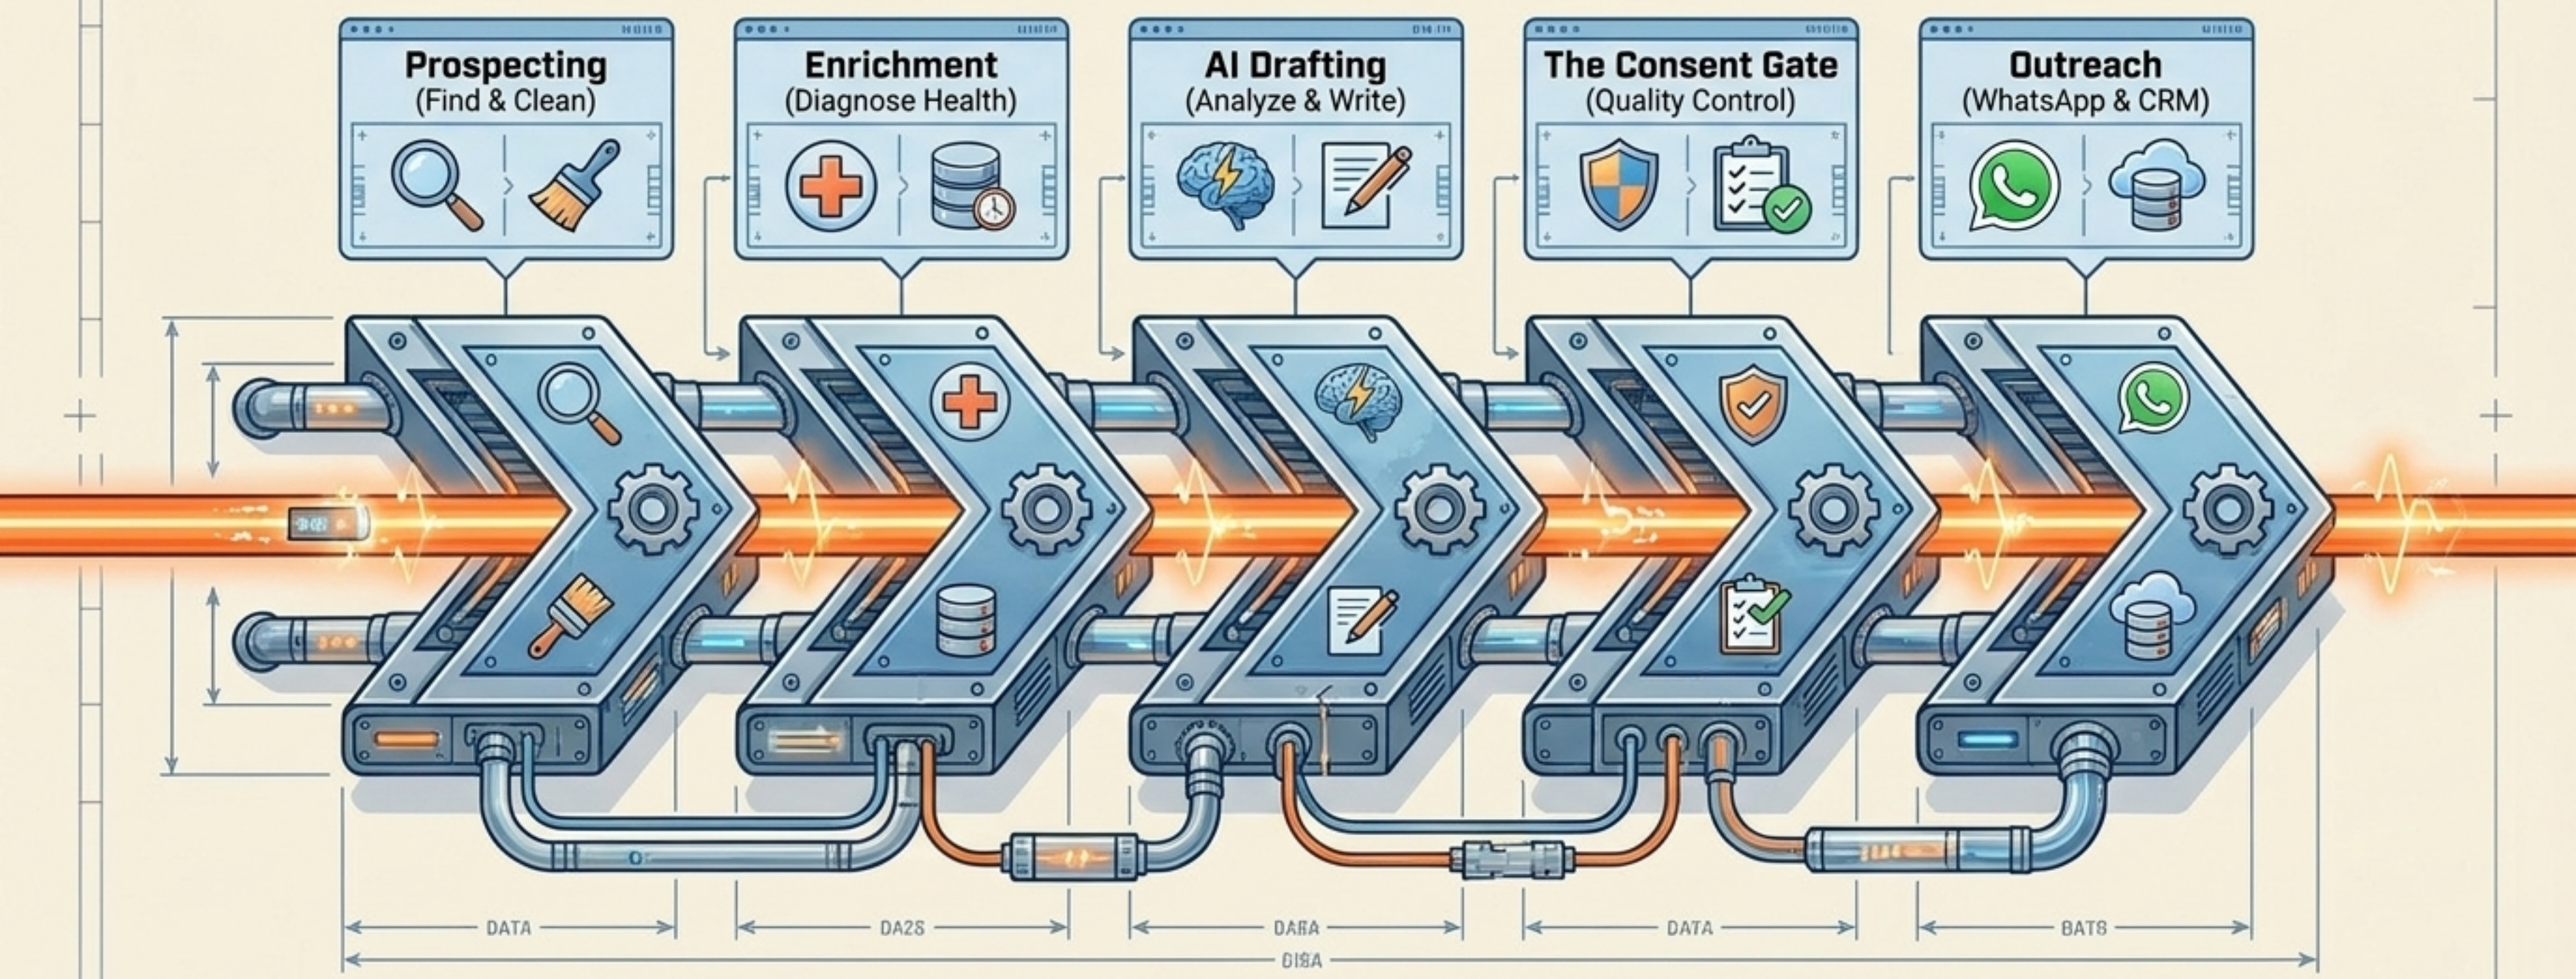

THE BRAIN: GOOGLE GEMINI 2.5 FLASH
Analyzes flaws, writes copy

THE MEMORY: SUPABASE POSTGRES
CRM, remembers the chat

Gemini Notebook

THE MASTER BLUEPRINT PIPELINE

Five distinct phases. Small, isolated workflows that pass data safely down the line, ensuring one failure never crashes the system.

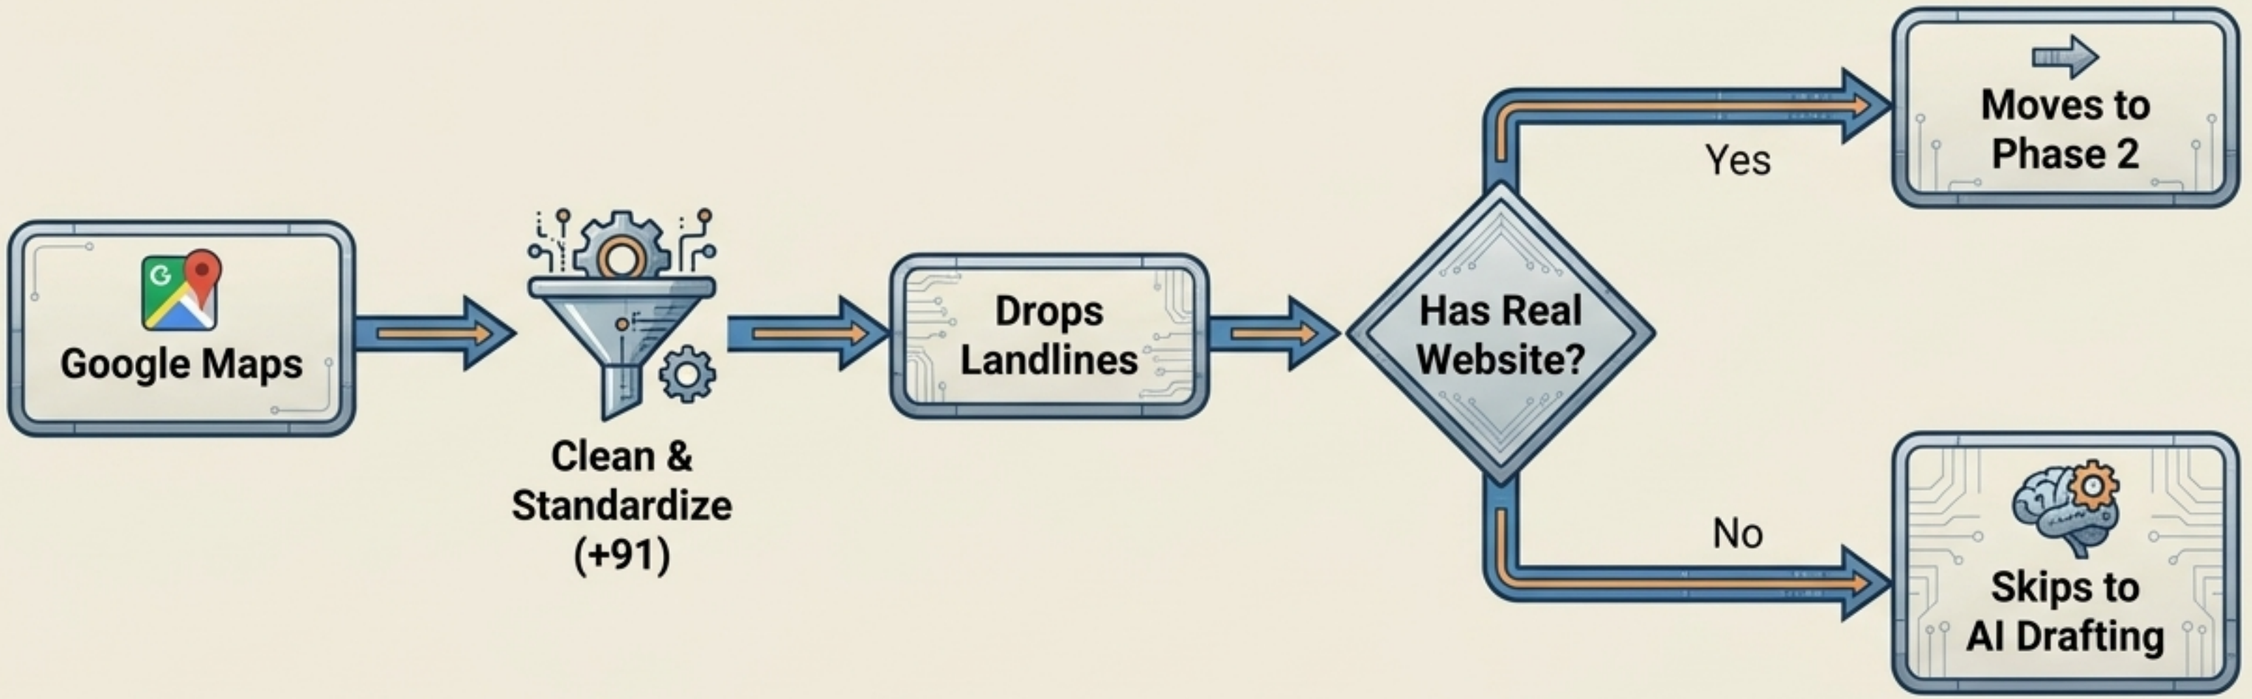

Gemini Notebook

PHASE 1: FINDING AND FILTERING RAW DATA

Messy searches turn into clean, actionable CRM rows. Bad phone numbers are dropped before they cost you money.

APIFY SCOUT: Uses free-tier credits ($5/mo) to scrape ~1,250 local places.

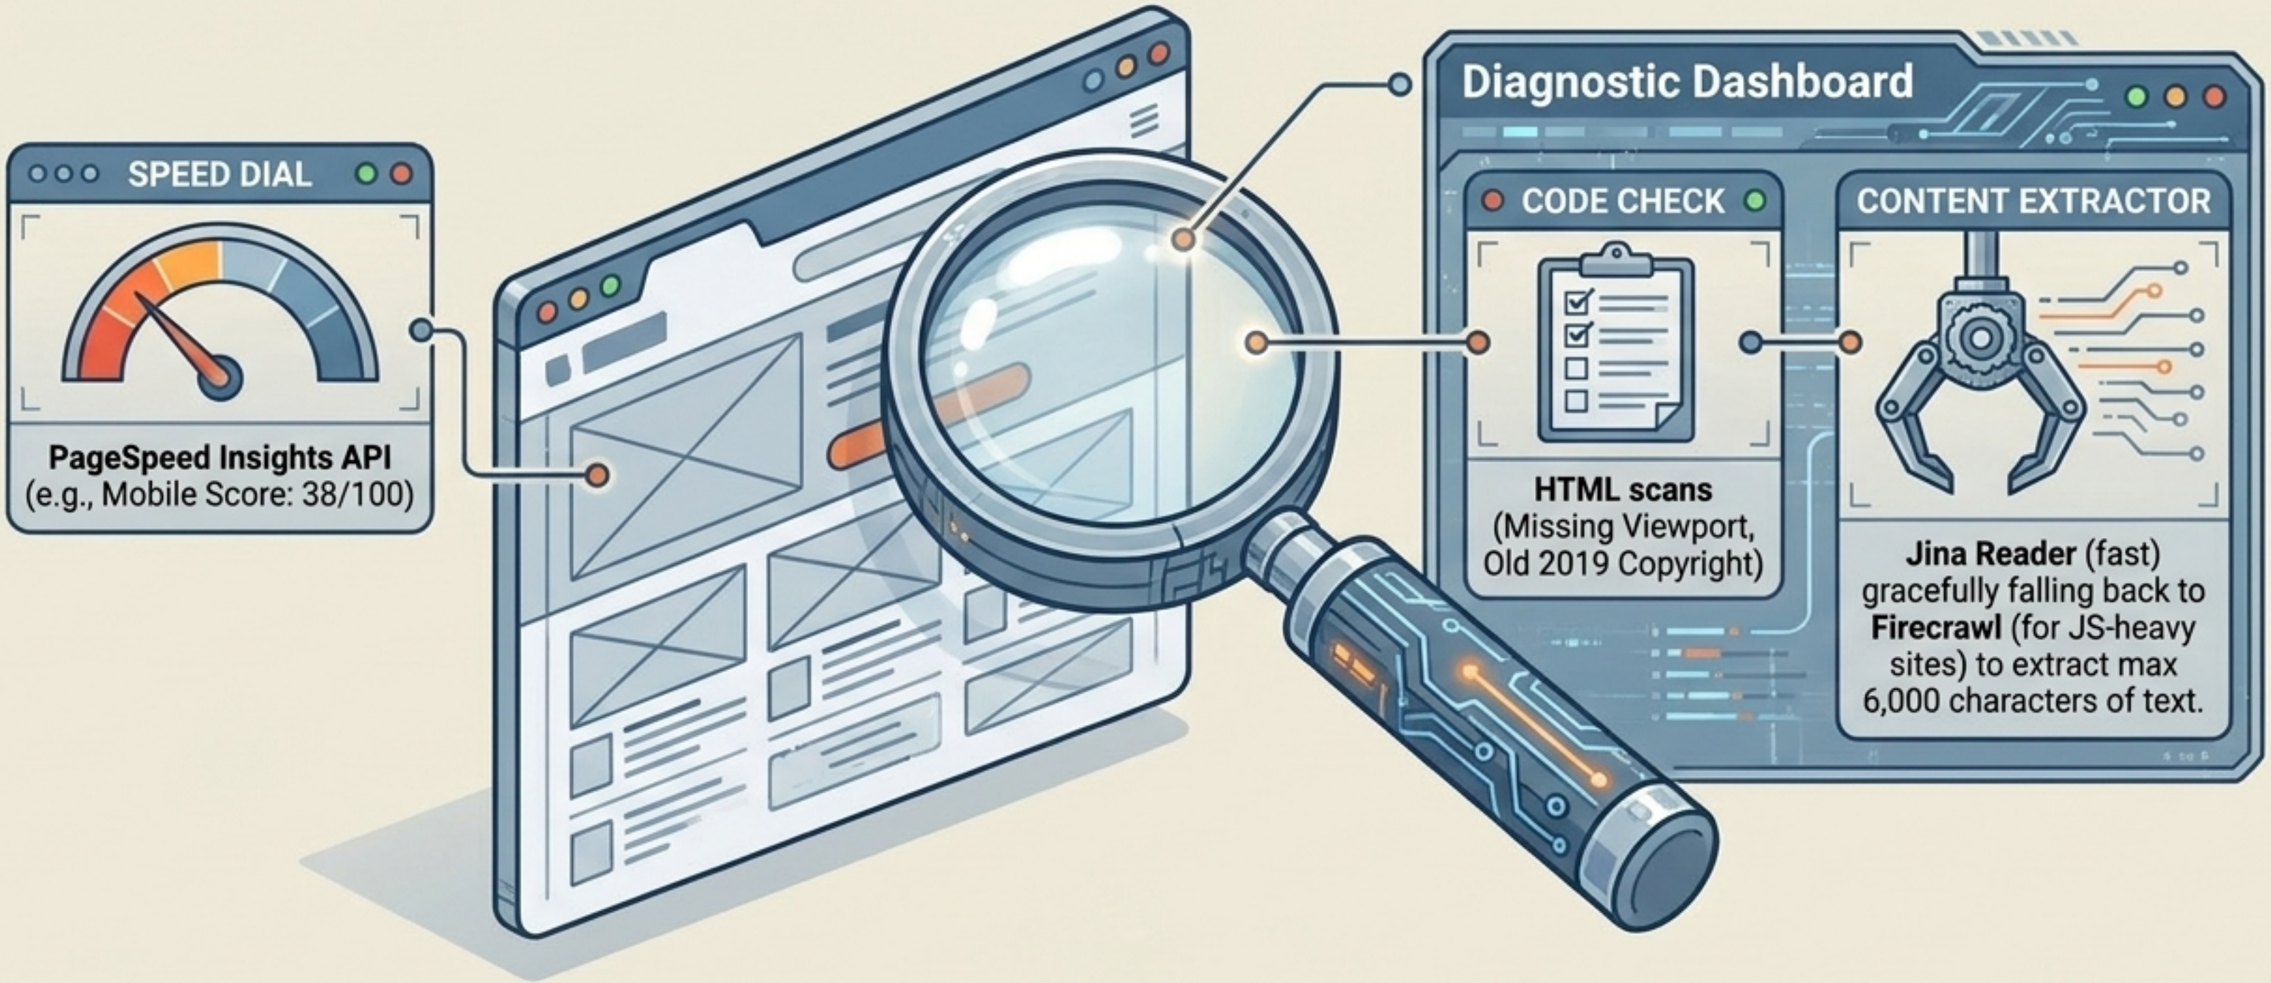

DEDUPLICATION: Automatically skips existing leads based on Google Maps Place ID.

Gemini Notebook

PHASE 2: DIAGNOSING DIGITAL HEALTH

We don't just find websites; we diagnose them with cheap, factual checks before the AI ever looks.

Gemini Notebook

THE HARSH CRITIC AND THE FRIENDLY COPYWRITER

Two AI passes ensure your outreach is rooted in factual evidence but delivered with absolute politeness. The Copywriter never sees the raw website—it only sees the Critic's verified evidence. It cannot invent facts.

The Harsh Critic

- **Instruction:** Be blunt, find flaws.
- **Output:** Strict JSON audit citing hard evidence (e.g., "Missing booking CTA").
- **Scope:** Internal only.

The Friendly Copywriter

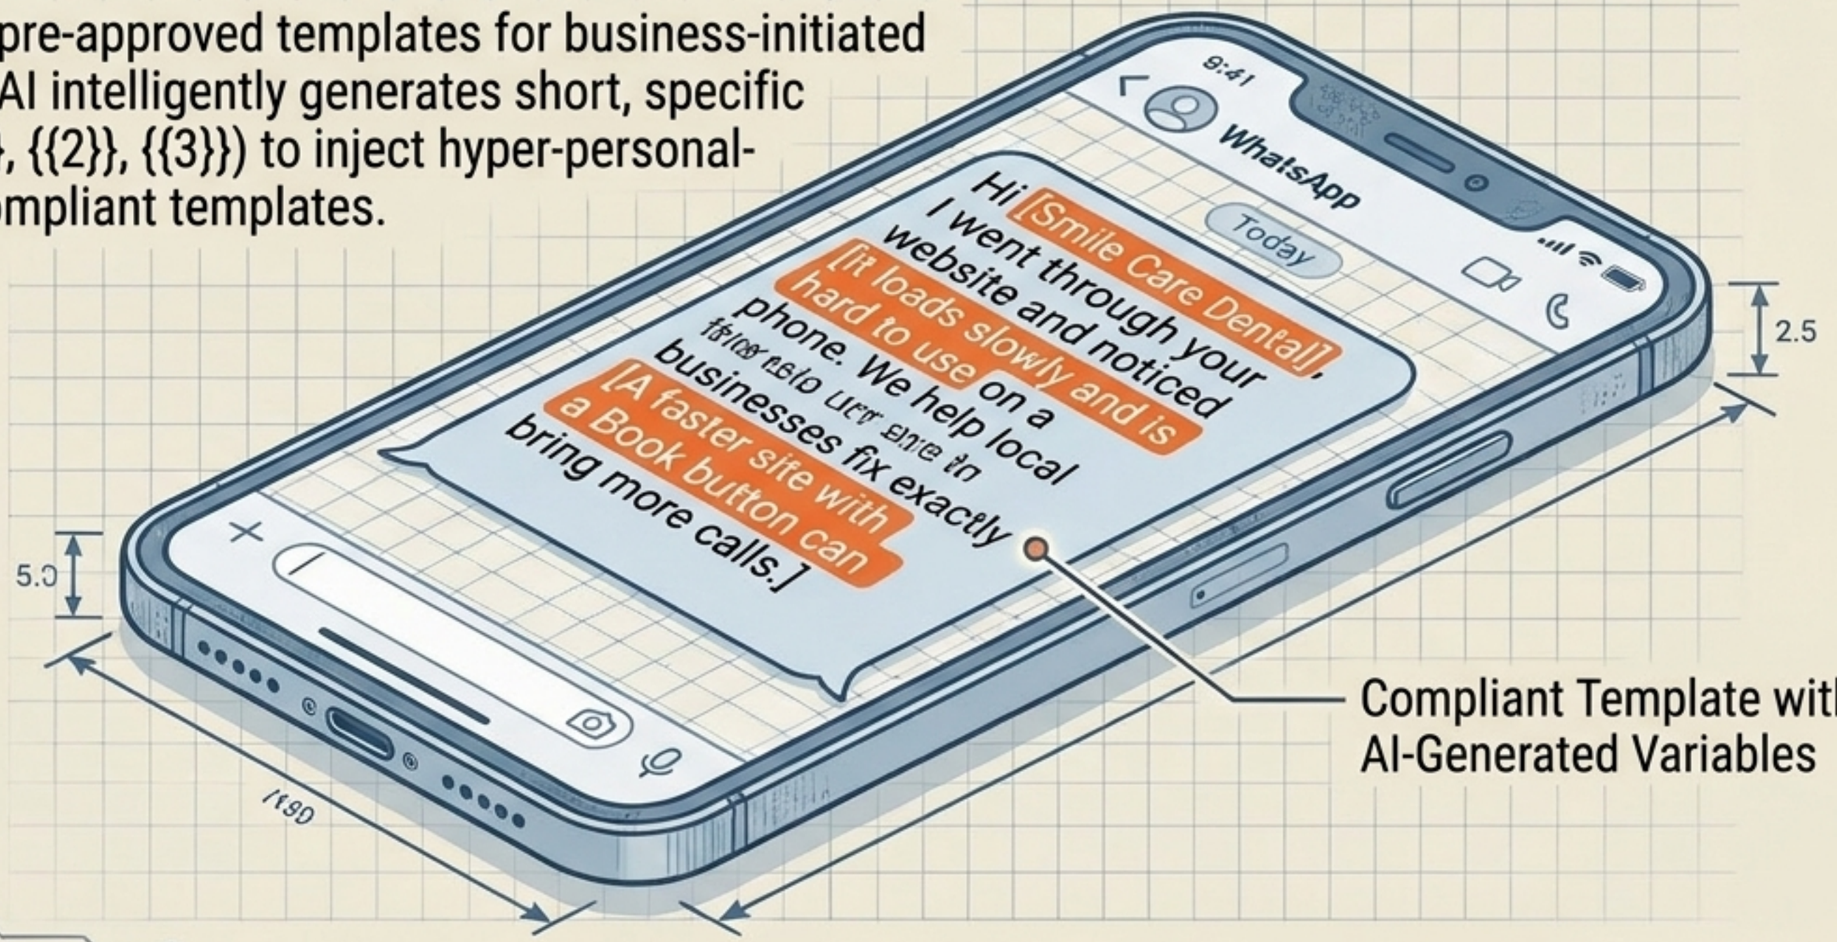

- **Instruction:** Be friendly, local consultant.
- **Output:** Polite WhatsApp draft.
- **Scope:** External facing.

Gemini Notebook

PLAYING BY WHATSAPP'S RULES

Personalization powered by AI, structured by Meta's strict compliance rules.

Meta requires pre-approved templates for business-initiated outreach. The AI intelligently generates short, specific variables ({{1}}, {{2}}, {{3}}) to inject hyper-personalization into compliant templates.

16:9"

Gemini Notebook

THE QUALITY & CONSENT GATE

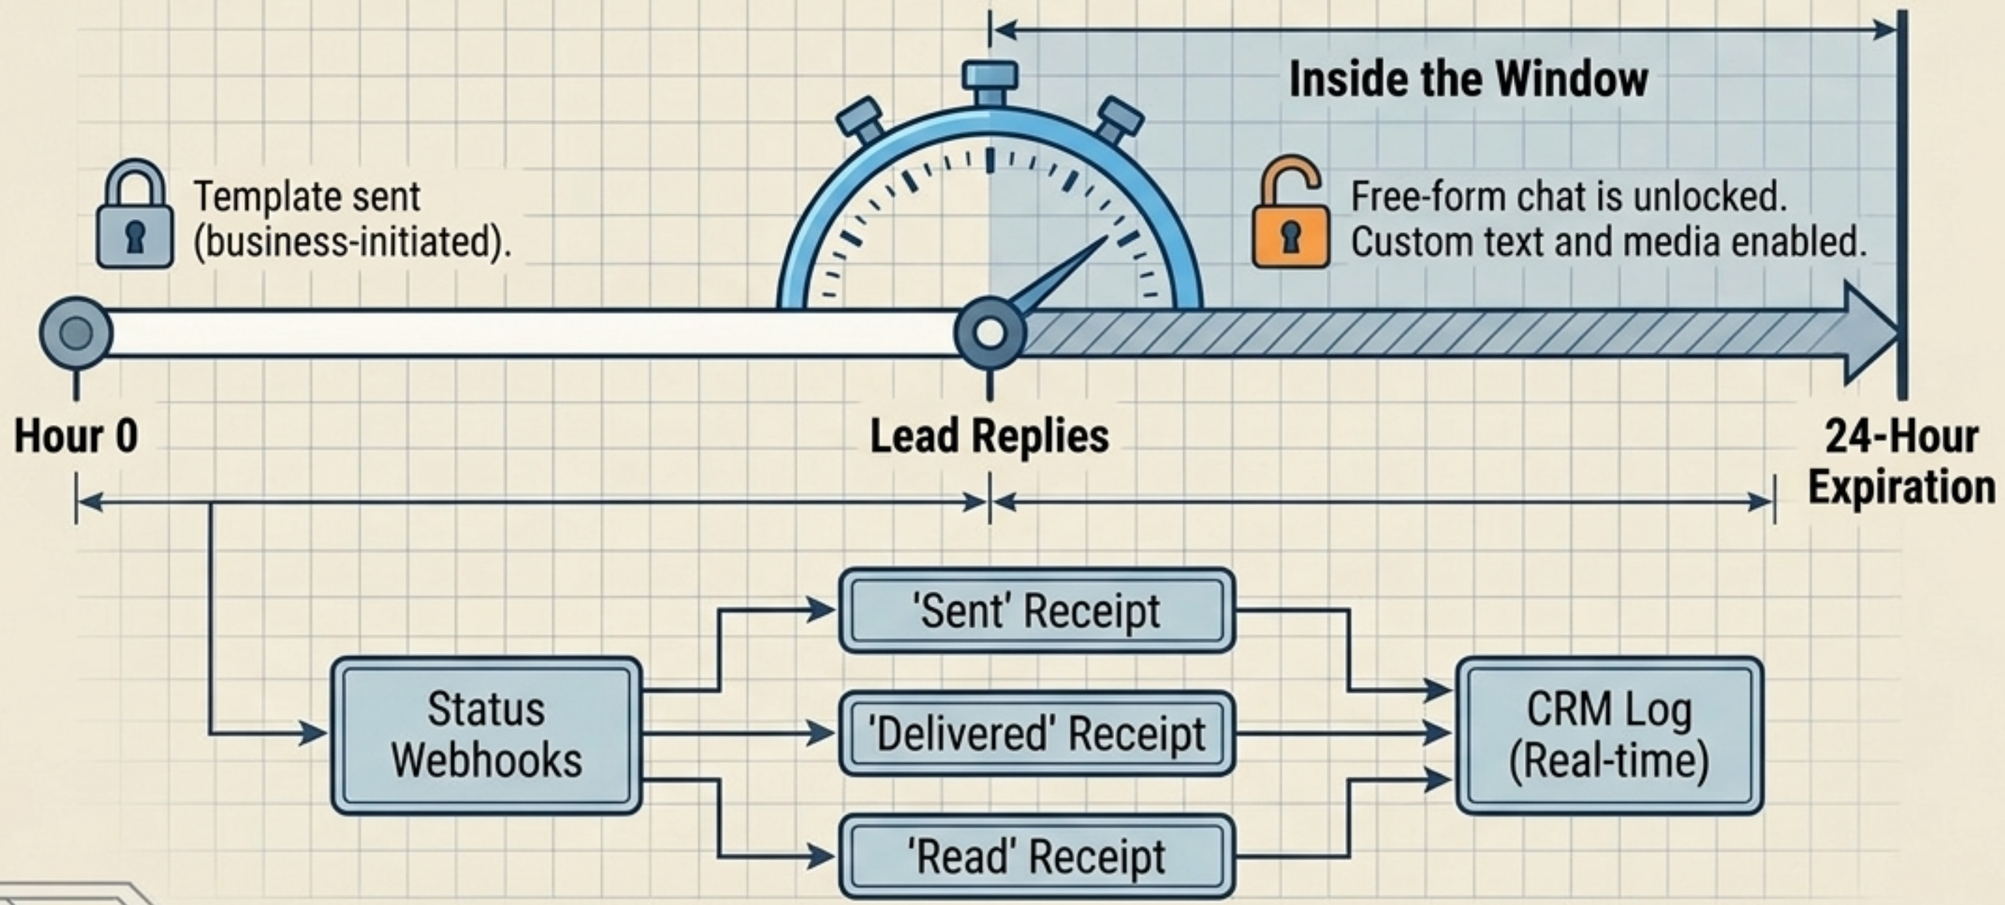

Your WhatsApp number is your most valuable asset. The Consent Gate ensures a message never fires until strict safety conditions are met.

Gemini Notebook

OUTREACH & THE 24-HOUR WINDOW

A reply unlocks the conversation. After 24 hours of silence, the window snaps shut, and you must use a template again. Status webhooks automatically log 'Sent', 'Delivered', and 'Read' receipts directly into the CRM in real-time.

Gemini Notebook

AI INTENT CLASSIFICATION

The AI filters the noise, instantly respecting opt-outs and flagging hot leads for human takeover.

Incoming WhatsApp Reply

Gemini 2.5 Flash-Lite

Stop / Opt-out

Auto-cancels follow-ups, marks as opted out.

Interested / Question

Triggers instant Telegram alert, generates draft reply.

Other

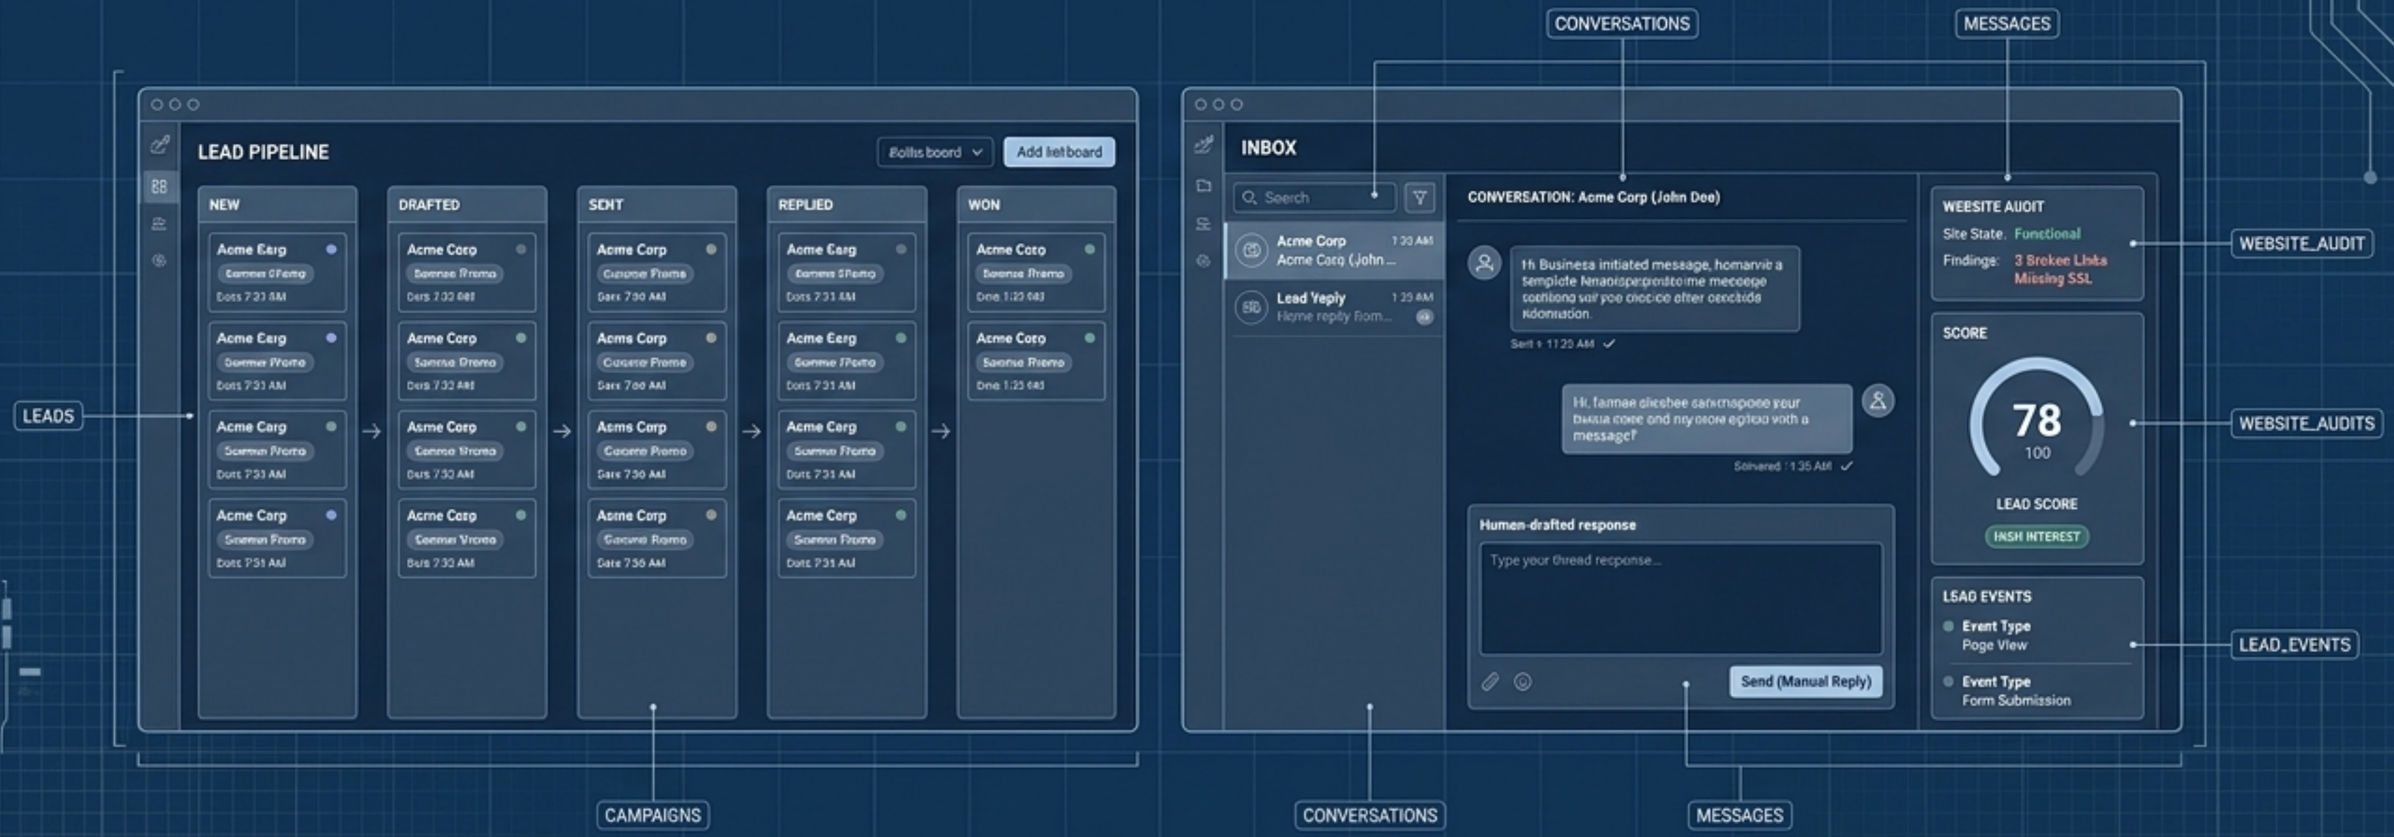

Leaves in inbox for human review.

Gemini Notebook

THE MEMORY: WHERE THE HUMAN TAKES OVER

You don't monitor workflows. You monitor your inbox.

Built on Supabase Postgres. n8n is stateless—if it crashes, no data is lost. Manual replies from this dashboard trigger an n8n webhook to send securely via WhatsApp API.

Gemini Notebook

Protecting the Factory Floor

Enterprise-grade safeguards prevent runaway costs, API bans, and spam reports.

Circuit Breaker: Auto-pauses all sending if >5 API failures occur in 30 minutes.

Time-Locks: Only dispatches messages between 10 AM and 6 PM IST.

Strict Caps: Limits daily volume to warm up the WhatsApp number safely.

Idempotency: Unique `wa_message_id` tracking guarantees the system can never send the exact same message twice.

Gemini Notebook

What Scaling Actually Costs

The software stack is virtually free. You only pay micro-fractions for the data scraped and the messages actually delivered.

Gemini API costs are fractions of a cent per lead. Self-hosted n8n and Supabase remain free. In India, a Meta marketing template costs ~Rs 1.02 (with GST).

Stage A (20 leads/day)		
Software: Free	WhatsApp: ~Rs 450/mo	Apify: Free

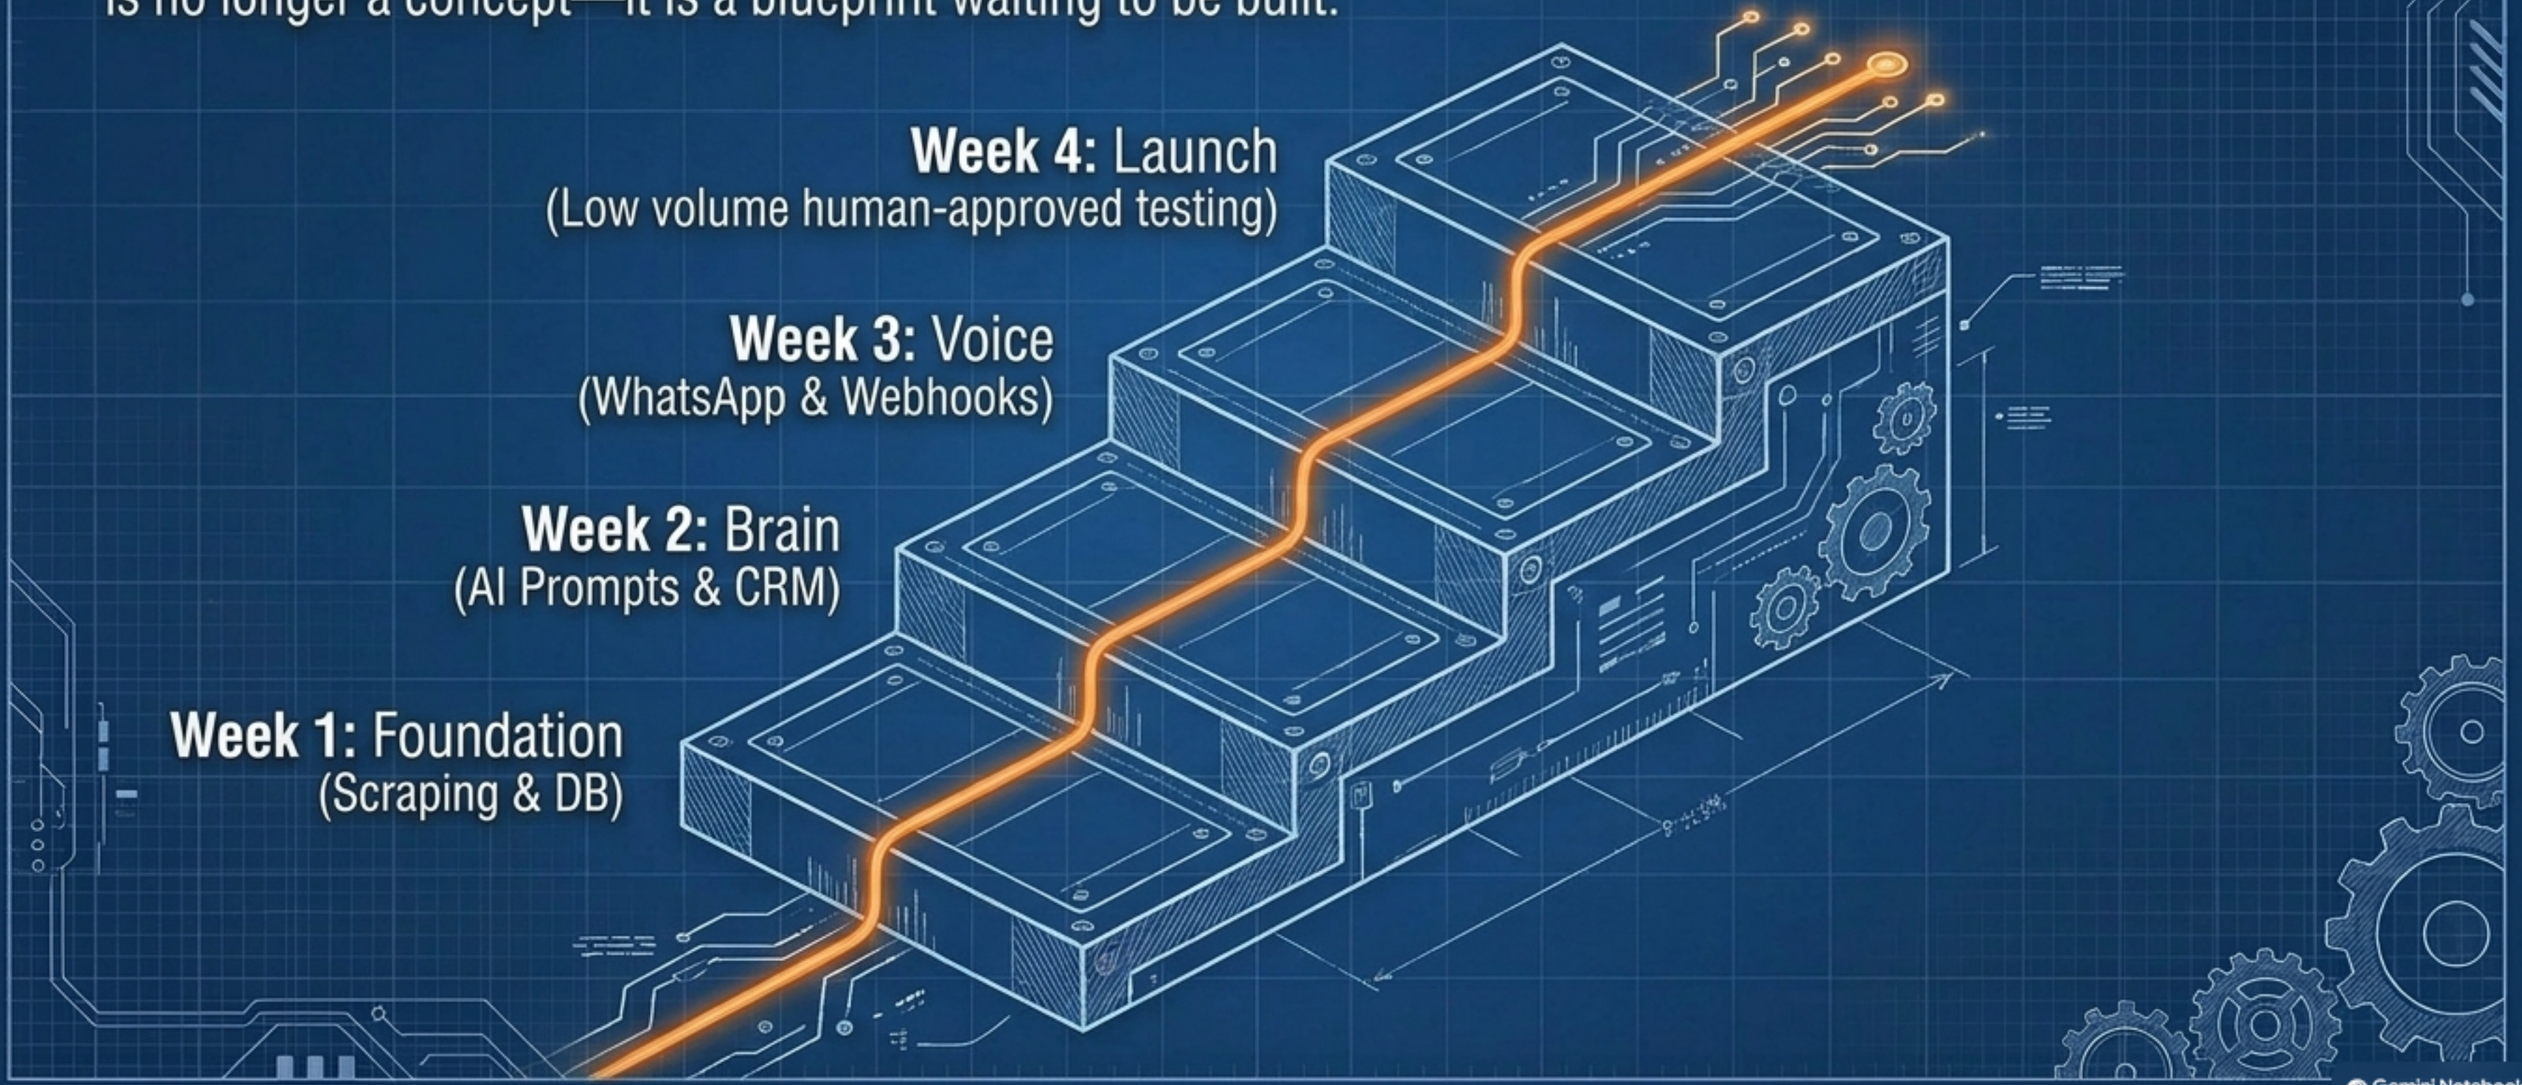

Stage B (50 leads/day)		
Software: Free	WhatsApp: ~Rs 1,120/mo	Apify: ~$16/mo

Stage C (100 leads/day)		
Software: Free	WhatsApp: ~Rs 2,240/mo	Apify: ~$32/mo
